

## FACTSHEET

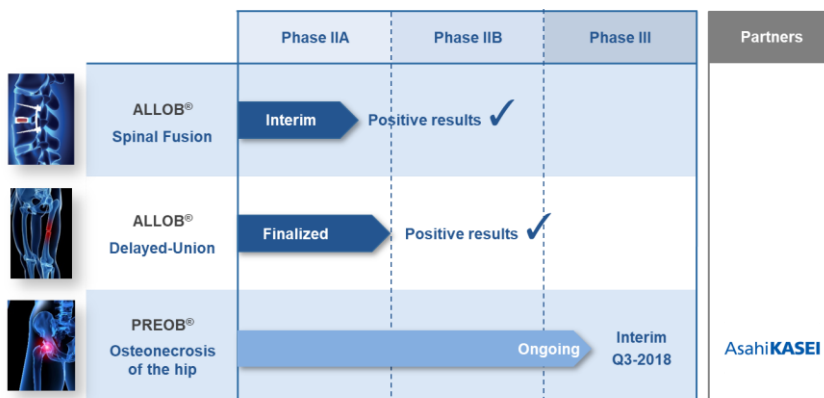

**Bone Therapeutics** is a leading biotechnology company specializing in the development of cell therapy products for orthopaedics and bone diseases.

Its unique technology allows to produce biologically active bone cells that are able to regenerate a healthy bone environment and promote bone regeneration.

The product candidates have been developed for the treatment of indications with high unmet medical needs such as degenerative diseases of the spine, severe unhealed fractures and osteonecrosis of the hip.

The products, administrable through a minimally invasive percutaneous approach without open surgery, do not require long hospitalization, have already shown encouraging clinical results and address important unmet medical needs.

### Product Pipeline

### Unique Technology Platform

**Bone Therapeutics** is bringing a unique value proposition by developing a range of innovative cell therapy products composed of differentiated bone-forming cells (osteoblasts) that can be administered via a minimally invasive procedure. These differentiated cells offer significant advantages in respect of safety and efficacy compared to undifferentiated stem cells.

### At a glance

- Unique cell therapy products for orthopaedic conditions and bone diseases
- Founded in June 2006
- HQ in Gosselies, Belgium
- Robust pipeline of advanced clinical Phase II and III programs
- Integrated organization with > 100 employees
- Solid IP position
- GMP production facility

### Management

#### Thomas Lienard

Chief Executive Officer  
(Lundbeck, Eli Lilly and Company, McKinsey & Company)

#### Jean-Luc Vandebroek

Chief Financial Officer  
(Alcopa, Fluxys, Ahold Delhaize)

#### Guy Heynen, MD

Chief Clinical & Regulatory Officer  
(Pfizer)

#### Benoit Champluvier, PhD

Chief Technology & Manufacturing Officer  
(GSK)

#### Nora Meskini

Director Clinical Operations  
(Cytori Therapeutics, Biosense Webster)

## FACTSHEET

### Bone Therapeutics' Products

#### ALLOB®

ALLOB®, Bone Therapeutics' allogeneic osteoblastic (bone-forming) cell product, is derived from cultured bone marrow cells from healthy adult donors. ALLOB® is currently in two Phase II proof-of-concept trials for the treatment of delayed-union fractures and spinal fusion procedures.

#### PREOB®

PREOB®, Bone Therapeutics' autologous osteoblastic cell product, is derived from cultured bone marrow cells from the patient. PREOB® is currently in a pivotal Phase III trial in Europe for osteonecrosis of the hip.

PREOB® received orphan drug designation for osteonecrosis from the EMA and the FDA.

### Key Financials

#### Wim Goemaere

*Non-executive Director*

#### Thomas Lienard

*Executive Managing Director*

### A game changer in orthopaedics

- A unique breakthrough technology based on:
  - differentiated bone-forming cells with regenerative capacities and
  - a minimally invasive administration
- Covering a diverse portfolio of bone diseases
- To address important unmet medical needs in the field of orthopaedics and bone diseases
